

Install a galvanic isolator in

LESS THAN 30 SECONDS!

INSTANTLY PROTECT

ANODES, PROPS, SHAFTS SKIN FITTINGS, HULLS ETC - LEAVE SHORE POWER CONNECTED WITHOUT CORROSION WORRIES

Why do I need a galvanic isolator?

G170 INLINE Safeshore inline isolator ONLY £99.99

When you plug into shore power 240 volts mains you also connect yourself to all neighbouring boats, pontoons, metal stantions and jetties.

Left unprotected this often results in rapid loss of your anodes, increased corrosion to underwater fittings, engine anode loss and even increased hull corrosion.

A galvanic isolator helps to prevent this type of corrosion.

ONLY £149.99

G170 SMI INLINE Safeshore inline isolator with built-in status monitoring Easy testing / Fault monitoring Maximum protection
